EDUCATION

B.Sc. in Software Engineering <i>Daffodil International University</i>	Jun. 2024 – Jun. 2028 <i>Dhaka, Bangladesh</i>
Higher Secondary Certificate (Science) <i>Lakshmipur Government College</i>	Jan. 2021 – Jan. 2023 <i>Lakshmipur, Bangladesh</i>
Secondary School Certificate (Science) <i>Lakshmipur Government Girls High School</i>	Jan. 2016 – Dec. 2020 <i>Lakshmipur, Bangladesh</i>

TECHNICAL SKILLS

Languages: C, Python, Java, JavaScript, SQL, Bash

Frameworks & Libraries: React, Node.js, Express, Flask, Streamlit, Pandas, NumPy, Scikit-learn, OpenCV, YOLO, MediaPipe

Databases: SQLite, MongoDB, MariaDB

Tools & Technologies: Git, GitHub, Docker, Linux, Oracle Cloud, Vercel, Supabase

Core Competencies: Full-Stack Development, AI Integration, Machine Learning, Computer Vision, System Design

PROJECTS

ClusterPilot Python, Kubernetes, Docker, Prometheus, Redis – Built an autonomous GPU resource-optimization platform tailored for Kubernetes-based AI processing clusters. – Implemented idle-GPU forecasting, safe resource reclamation mechanisms, and priority-based workload scheduling. – Developed real-time administrative dashboards featuring GPU utilization, cost analytics, and cluster health metrics.	Jan. 2026 – Present
BioGraph Python, AI Models, Data Analysis – Led a team to build and fine-tune an AI model analyzing specialized NASA astronomical and earth science datasets. – Engineered a confidence-scoring system to ensure highly reliable information retrieval and hypothesis validation. – Organized workflow pipelines for seamless data parsing and model evaluation under tight hackathon timelines.	NASA Space Apps Challenge
Smart Housing System Microcontrollers, C/C++, Embedded Sensors – Engineered an integrated automated housing security system featuring real-time motion sensors and theft detection alerts. – Designed an ultrasonic distance sensor array for precise car parking assistance and obstacle detection. – Integrated multimedia documentation pipelines, incorporating photo and video monitoring sections for live status checks.	Completed

LEADERSHIP & ACHIEVEMENTS

Team Leadership

- Served as Team Leader for the **ClusterPilot** project and the **NASA Space Apps Challenge** team, driving technical design, task delegation, and timeline management.
- Demonstrated strong team orchestration and problem-solving skills across collaborative AI and system design competitions.
